### Price & information Sheet

DATE : JUNE, 2006

#### sample pricing

Item No.:	A108060
Description :	Solar Garden Light
Size :	H60cm
Unit Price (USD) :	\$94.00
FOB Port:	Yantian, China
Surface Material :	Stainless Steel
Solar Panel :	1.3W, Imported , Polycrystalline / Monocrystalline
Light Source :	6 LED (Life of LED : 50,000 Hours)
Light Source (White	
Light Duration :	8 - 10 Hours while fully charged
Battery Included :	1400mAh NI-MH for 6 LED Lamps
Packing :	2 pcs in Brown Box
MOQ :	1 x 20' Container (778 Pcs)

#### REMARKS :

- 1) Life of solar panel: 10 years approx..
- 2) Life of battery: 3 years approx..
- 3) CE Certificate (approved by ETS)
- 4) 2-year limited warranty except battery and energy-saving fluorescent lamp

#### CAUTION:

- 1) The solar light should be placed under direct sun light, the solar panel transform the rays light into electrical energy and recharge the batteries, in the dark it uses the electricity stocked for lighting, so it must be good, and cleaned from time to time.
- 2) It's recommended for first use, to let the solar light **two entire days under the sun**, in order to recharge the batteries at the maximum, after that you can put in AUTO, and keep like that all the year.
- 3). When the temperature rises or falls of 25°C with the stable intensity of sunlight, the performance of the solar panel is reduced proportionally to reach a 20% of its capacity max. The geographic situation, seasons of the year, climate conditions also can affect the performance. In general, the solar light can keep more life in the summer than in the winter due the batteries recharge more in the summer.
